

Midterm Activity #4 - Student Enrollment Assessment System

Submitted by: Arevalo, Jay Clifferson P.

Course, Year & Section: BSIT 2-3

Course Code & Description: COMP 009 Object Oriented Programming

Submitted to: Sir SEVERINO M. BEDIS JR.

General Instructions

Instructions

1. Create a Java program named `EnrollmentAssessmentSystemLastName`.
2. Import and use the `Scanner` class to accept user input.
3. Ask the user to input the following information:
 - Student Name
 - Senior High School Strand (STEM, ABM, HUMSS, TVL, Others)
 - Entrance Exam Score (0-100)
 - Interview Score (0-100)
 - First Screening Result (Pass/Fail)
4. Compute the Final Evaluation Score using the formula:
$$FinalScore = (EntranceExam \times 0.60) + (InterviewScore \times 0.40)$$
5. Use a nested if statement to determine the admission result.

Conditions:

- If First Screening = Pass
 - If `FinalScore` $\geq$ 85 $\rightarrow$ Admitted with Scholarship
 - If `FinalScore` $\geq$ 75 $\rightarrow$ Admitted
 - If `FinalScore` $\geq$ 65 $\rightarrow$ Waitlisted
 - Otherwise $\rightarrow$ Not Qualified

- If First Screening = Fail
 - Automatically Not Qualified

6. Use a switch statement to determine Program Recommendation based on the strand:

Strand	Recommended Program
STEM	BSIT / BSCS
ABM	BSBA
HUMSS	BMED / AB Communication
TVL	BSIT
Others	General Program

7. Display the result in the following format:

```
===== ENROLLMENT ASSESSMENT RESULT =====
```

```
Student Name: Maria Santos
```

```
SHS Strand: STEM
```

```
Final Evaluation Score: 82.50
```

```
Admission Result: Admitted
```

```
Recommended Program: BSIT / BSCS
```

PART 1 of the screenshot User Input/progress/result

```

^ !!----- STUDENT ENROLLMENT ASSESSMENT SYSTEM NI JAY! -----!!

--- Please Enter Student Details ---
Student Name: Marian Nivera
SHS Strand (STEM, ABM, HUMSS, TVL, Others): STEM
Entrance Exam Score (0 to 100): 75
Interview Score (0 to 100): 75
First Screening Result is it a (Pass/Fail): Pass

===== ENROLLMENT ASSESSMENT RESULT =====
Student Name: Marian Nivera
SHS Strand: STEM
Final Evaluation Score: 75.00
Admission Result: Admitted
Recommended Program: BSIT / BSCS
=====

Would you like to assess another student? Just type in (yes/no): |

```

PART 2 of the screenshot User Input/progress/result

```

Would you like to assess another student? Just type in (yes/no): yes

--- Please Enter Student Details ---
Student Name: Jay Arevalo
SHS Strand (STEM, ABM, HUMSS, TVL, Others): STEM
Entrance Exam Score (0 to 100): 100
Interview Score (0 to 100): 100
First Screening Result is it a (Pass/Fail): Pass

===== ENROLLMENT ASSESSMENT RESULT =====
Student Name: Jay Arevalo
SHS Strand: STEM
Final Evaluation Score: 100.00
Admission Result: Admitted with Scholarship
Recommended Program: BSIT / BSCS
=====

Would you like to assess another student? Just type in (yes/no): no

Thank you for using the Enrollment Assessment System ni Jay Arevalo ang the goat!
Goodbye!

```

PART 3 of the screenshot User Input/progress/result

Output Clear

```
!!----- STUDENT ENROLLMENT ASSESSMENT SYSTEM NI JAY! -----!!

--- Please Enter Student Details ---
Student Name: Jopard
SHS Strand (STEM, ABM, HUMSS, TVL, Others): Others
Entrance Exam Score (0 to 100): 51
Interview Score (0 to 100): 421
ERROR!
--> Invalid Error: EKIS BAWAL YAN! Score must be exactly between 0 and 100.
Interview Score (0 to 100): 42
First Screening Result is it a (Pass/Fail): Fail

===== ENROLLMENT ASSESSMENT RESULT =====
Student Name: Jopard
SHS Strand: OTHERS
Final Evaluation Score: 47.40
Admission Result: Automatically Not Qualified
Recommended Program: General Program
=====

Would you like to assess another student? Just type in (yes/no):
```

Code

```

import java.util.Scanner;
